

# Blockchain and Smart (Legal) Contracts

Summer School: Transnational Commercial Law & Technology

Verona, May 30 – June 1, 2019

Nevena Jevremovic, IACCM

## Part I: Contract and Commercial Management

## Part II: Blockchain and Smart (Legal) Contracts

## Part III: Challenges

# Contract and Commercial Management

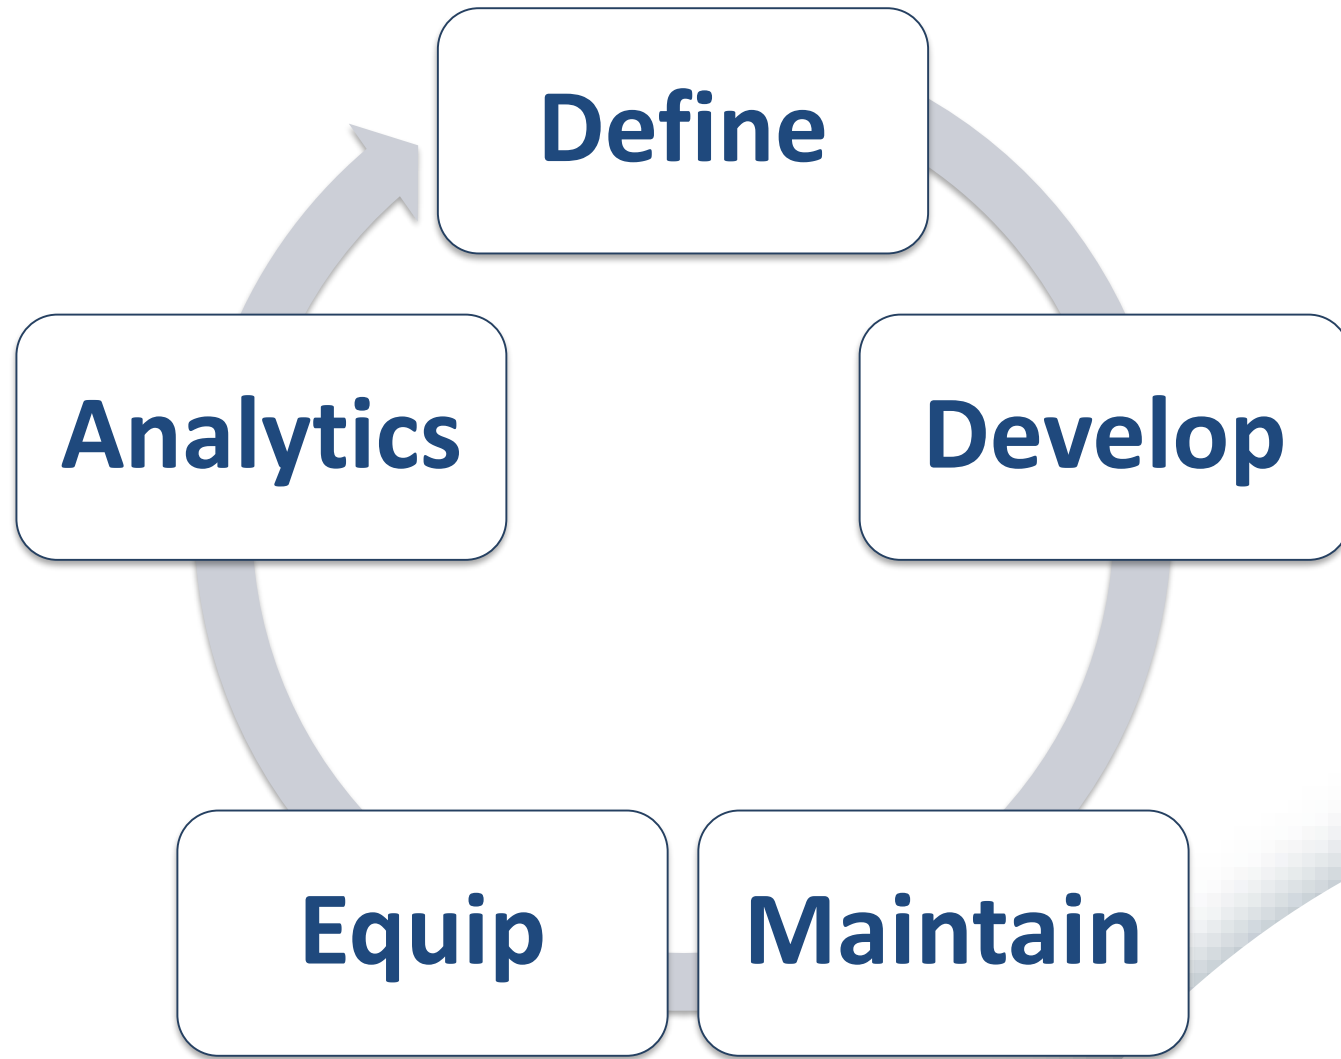

---

## Contract and Commercial Management

# CCM: Strategic

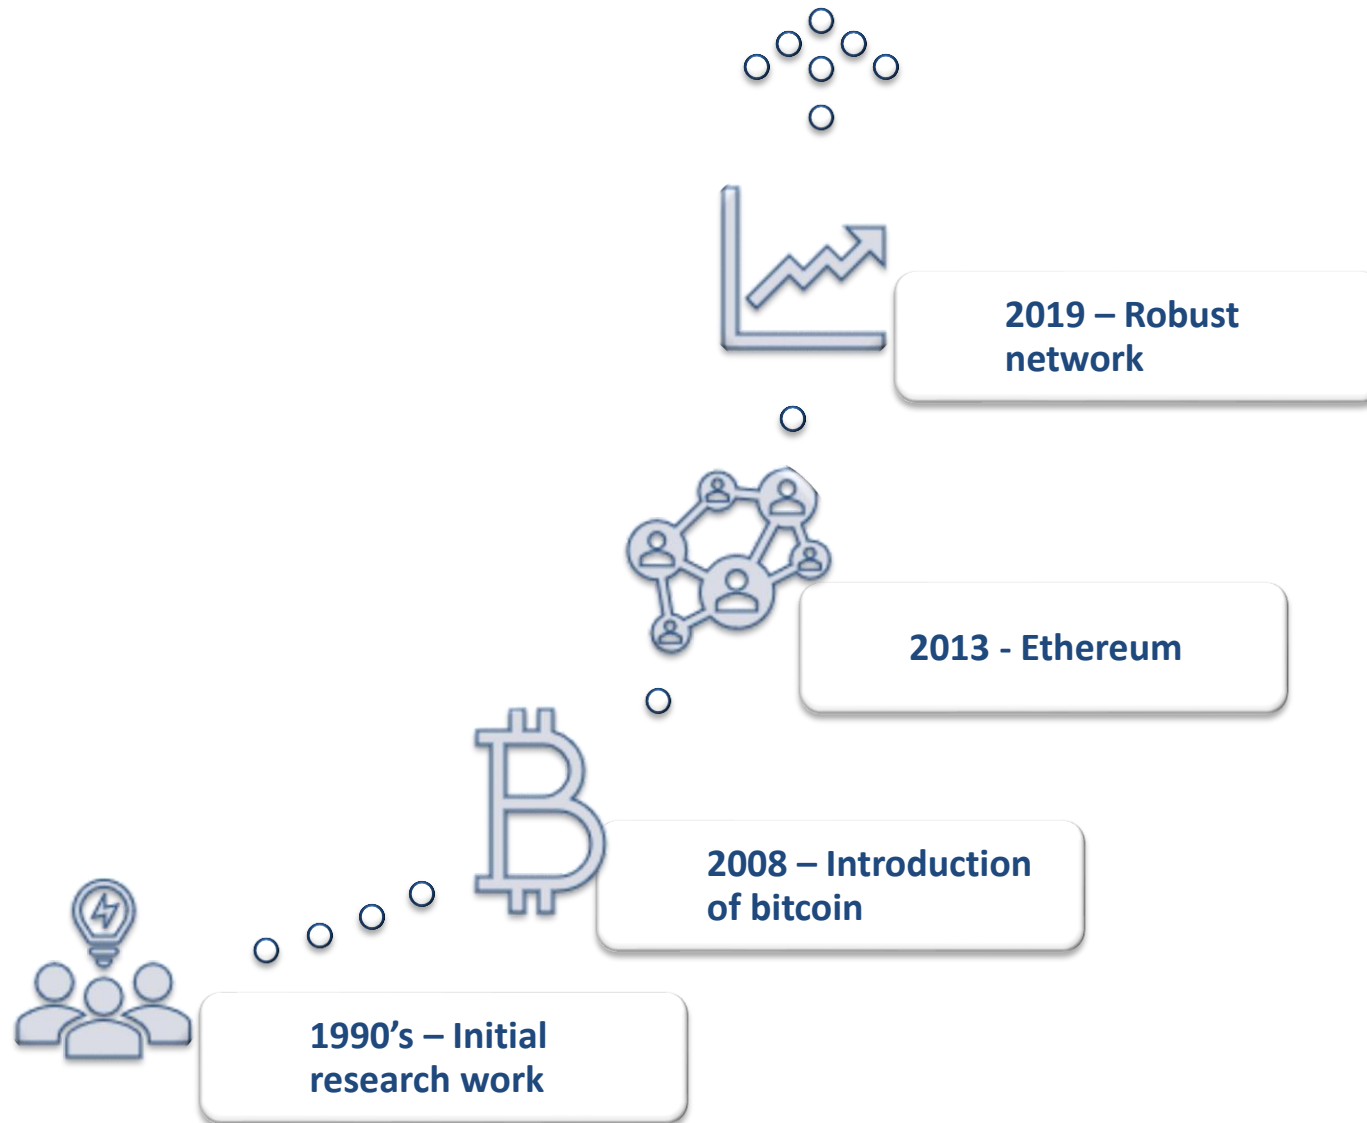

# CCM: Transactional

# Blockchain

---

# How did it develop?

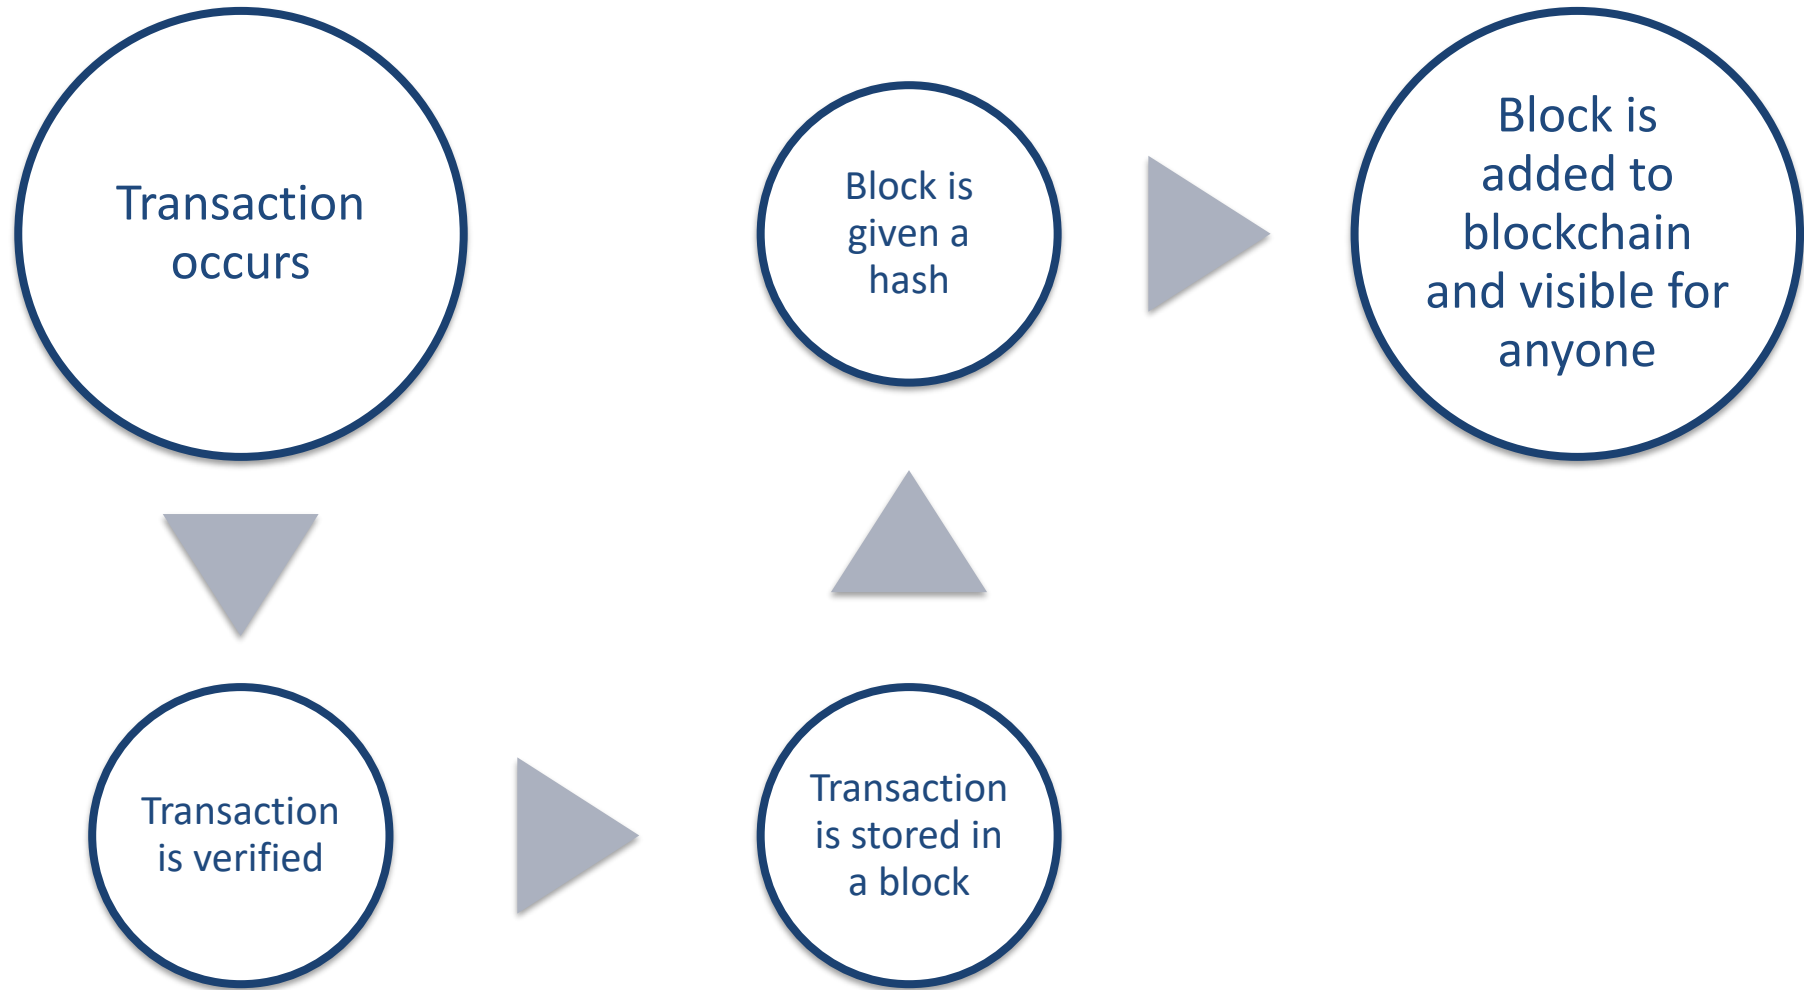

# What is it?

Blockchain is a *distributed, decentralized, public ledger*.

# How it works?

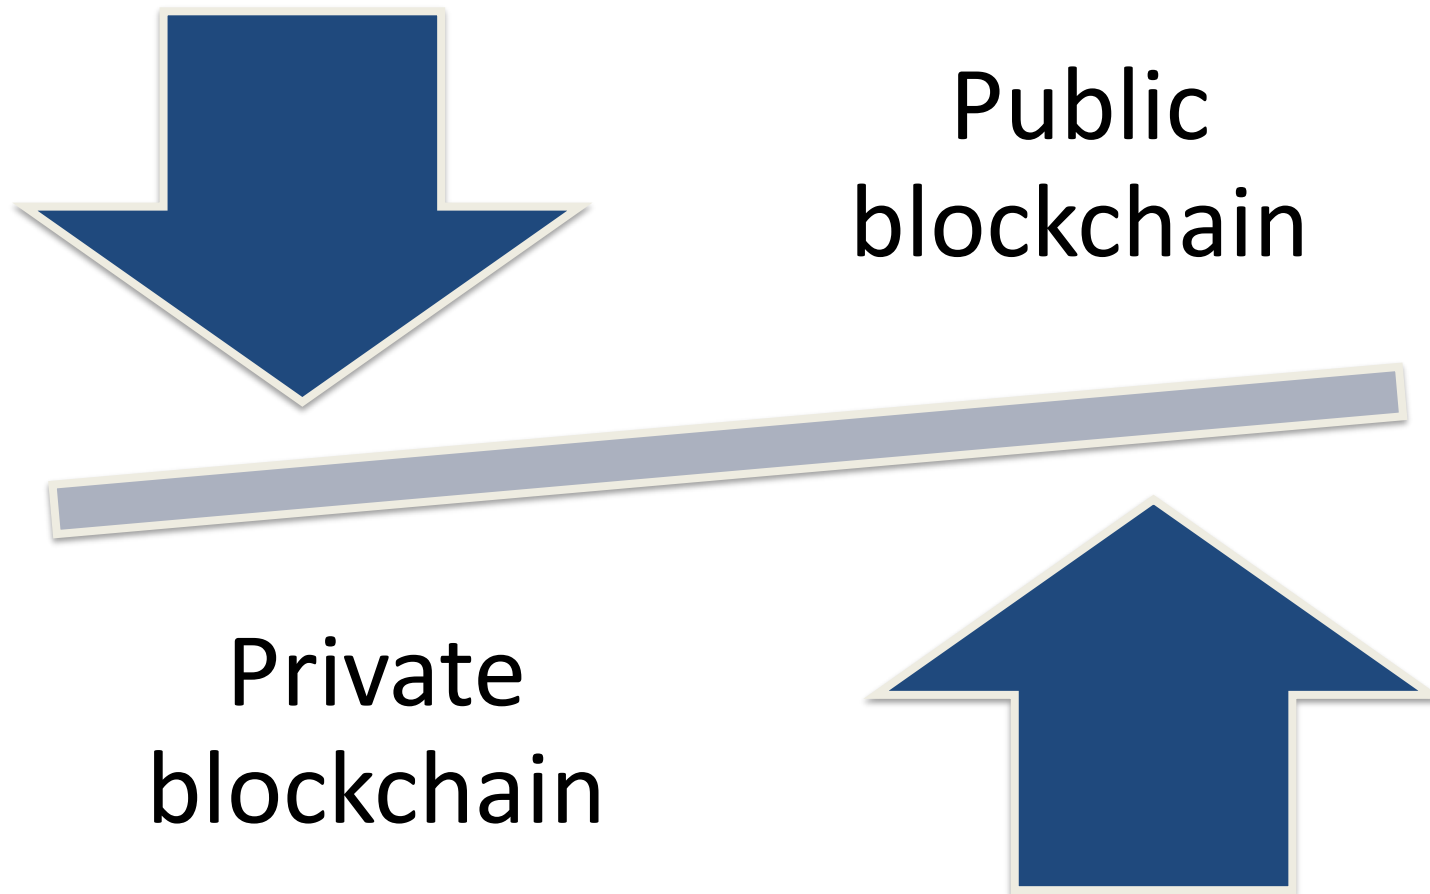

# Three key elements

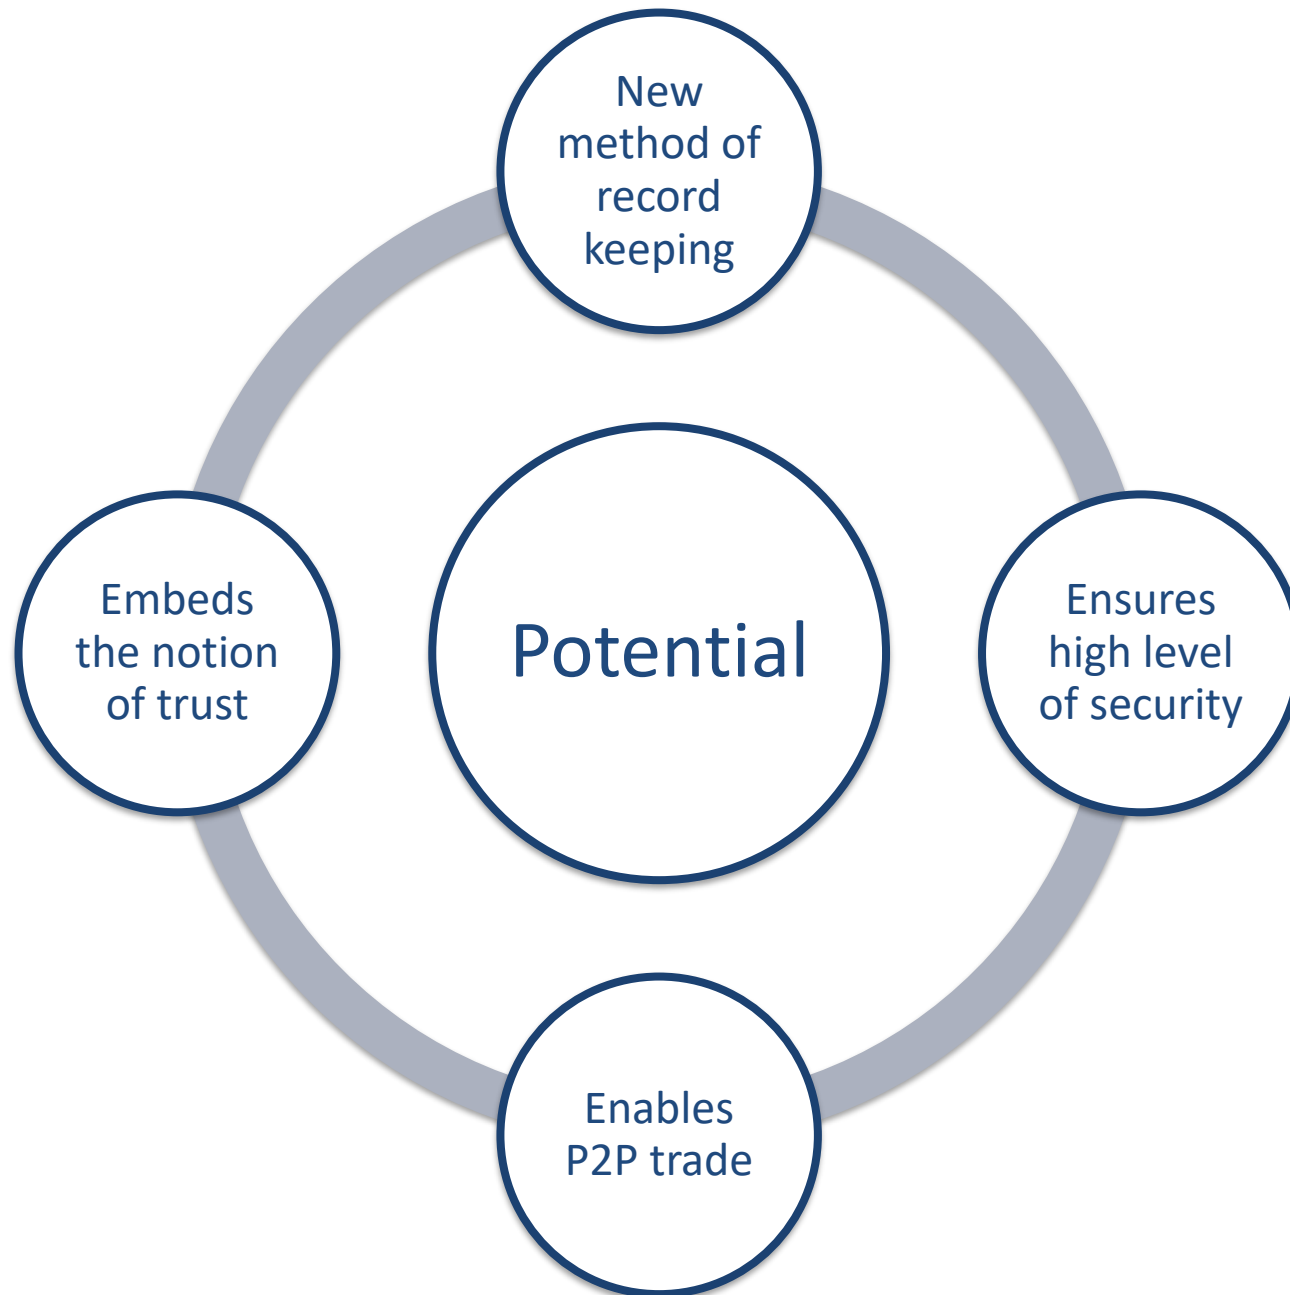

1. The ledger
2. The network
3. The consensus

# Are all blockchains the same?

# Why is it important?

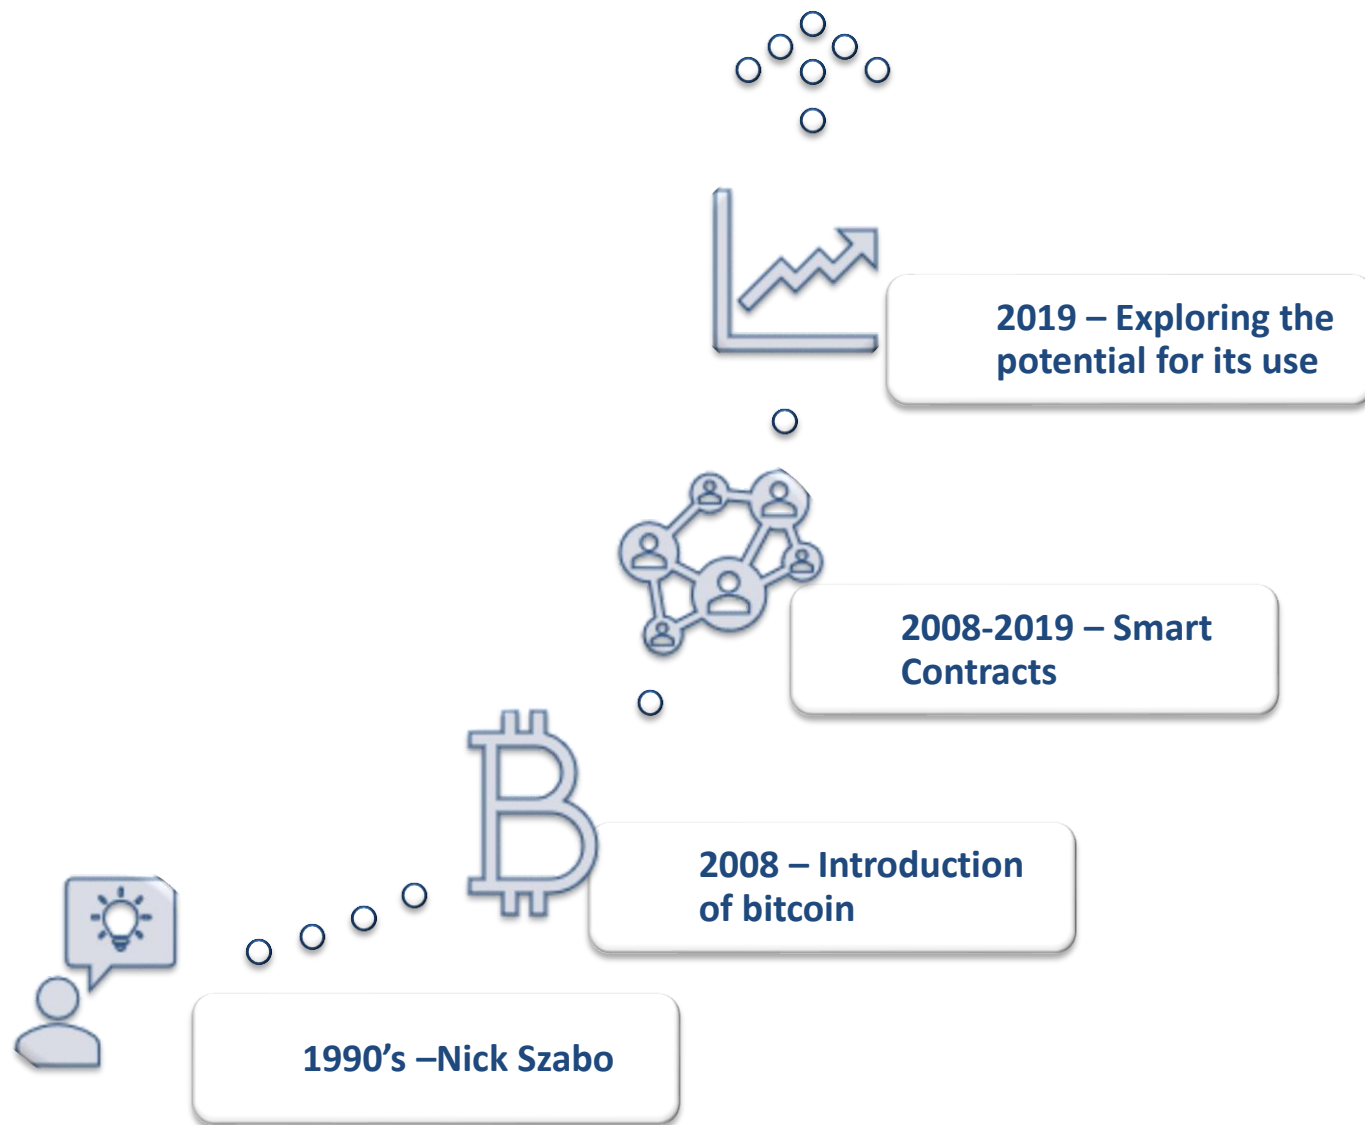

# Smart (Legal) Contracts

---

# Evolution of *digital agreements*

# Evolution of smart contracts

*A smart contract is a **piece of software** (code) **run** on a **distributed ledger** enabling **automatic execution of an agreement** reached between two or more parties.*

A “smart” legal contract is a **legally binding agreement** that is **digital** and able to **connect** its **terms** and **the performance of its obligations** to **external sources of data** and **software systems**.

# Use Cases

---

# IBM and Maersk: Cross Border Supply Chain

The flower grower readies the product for international shipment. Shipment information is added to the blockchain.

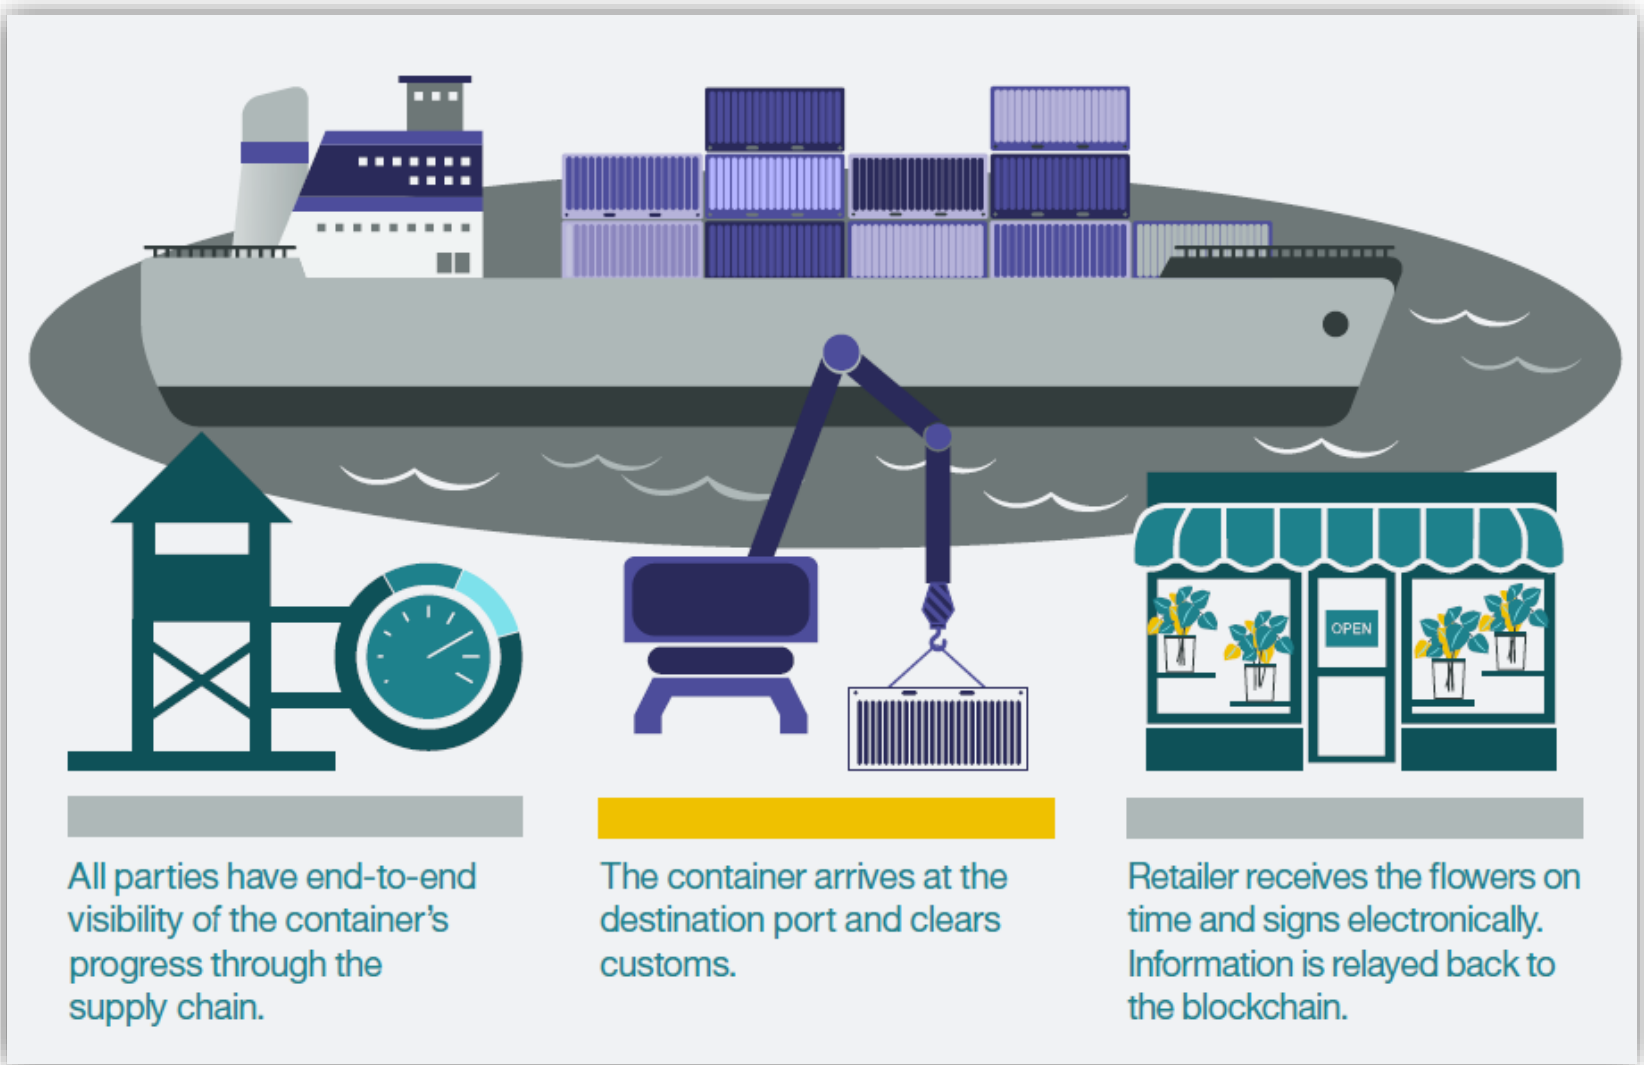

As the container awaits transfer to port, officials submit approvals electronically. Blockchain confirms the transaction and executes a smart contract, releasing the shipment.

The container is loaded onto the ship.

# IBM and Maersk: Cross Border Supply Chain

All parties have end-to-end visibility of the container's progress through the supply chain.

The container arrives at the destination port and clears customs.

Retailer receives the flowers on time and signs electronically. Information is relayed back to the blockchain.

# Walmart Case Study: Food Safety Control

For mangoes in the US, the time needed to trace their provenance went from 7 days to... 2.2 seconds!

7 Day Tracking

2.2 Second Tracking

# Accord Project Template

Ergo    Test Execution

[Send Request](#)    [Reset Contract](#)

**Request**

```
1 {
2   "$class": "org.accordproject.signature.ContractSigned",
3   "contract": "MY_CONTRACT"
4 }
```

**Response**

```
1 {
2   "$class": "org.accordproject.cicero.runtime.Response",
3   "transactionId": "f34f3c47-8b77-489a-8d8e-5d1491f4d2ae",
4   "timestamp": "2019-05-28T12:25:40.858Z"
5 }
```

**Contract State**

```
1 {
2   "$class": "org.accordproject.payment.fulluponsignature.FullPaymentUponSignatureState",
3   "status": "INITIALIZED",
4   "stateId": "1"
5 }
```

**Obligations**

```
1 []
```

# Accord Project Template

[Send Request](#) [Reset Contract](#)

**Request**

```
1 {
2   "Sclass": "org.accordproject.signature.ContractSigned",
3   "contract": "MY_CONTRACT"
4 }
```

**Response**

```
1 {
2   "Sclass": "org.accordproject.cicero.runtime.Response",
3   "transactionId": "4b85133b-fc40-4f46-9ae8-5911ecb65a53",
4   "timestamp": "2019-05-28T12:27:24.327Z"
5 }
```

**Contract State**

```
1 {
2   "Sclass": "org.accordproject.payment.fulluponsignature.FullPaymentUponSignatureState",
3   "status": "OBLIGATION_EMITTED",
4   "stateId": "1"
5 }
```

**Obligations**

```
1 [
2   {
3     "Sclass": "org.accordproject.cicero.runtime.PaymentObligation",
4     "amount": {
5       "Sclass": "org.accordproject.money.MonetaryAmount",
6       "doubleValue": 0.01,
7       "currencyCode": "USD"
8     },
9     "description": "Dan should pay contract amount to Steve",
10    "contract":
11      "resource:org.accordproject.payment.fulluponsignature.FullPaymentUponSignatureContract#fa7932cb-3a70-4ece-93c4-22a43662119c",
12    "promisor": "resource:org.accordproject.cicero.contract.AccordParty#Dan",
13    "promisee": "resource:org.accordproject.cicero.contract.AccordParty#Steve",
14    "eventId": "valid",
15    "timestamp": "2019-05-28T12:27:24.328Z"
16  }
17 ]
```

# Challenges

---

# Focus thus far...

- Are smart contracts *contracts*?
- Do we need a legal framework to regulate blockchain and smart contracts?
- What would be the appropriate legal framework for regulating smart contracts and blockchain?

What it comes down to...

Contract simplification and design

Thank you!

## Setting the Global Standard
